Planning Application #: 15-106
Date Received: 12/17/2015
Fee Paid: $310.00
Recept #: 792062

City of Albany
PLANNING APPLICATION FORM
NON-RESIDENTIAL

Please complete the following application to initiate City review of your application. Please be aware that staff may have additional application requirements. For projects requiring Planning and Zoning Commission review, please schedule an appointment with Planning Division staff. The Community Development Department office is open to accept applications Monday, 8:30 AM to 7:00 PM, Tuesday through Thursday 8:30 AM to 5:00 PM, and Friday 8:30 AM to 12:30 PM (closed Noon – 1PM, Mon. – Thu.) at 1000 San Pablo Avenue, Albany, CA 94706 (510) 528-5760.

Fee Schedule (FY 2013-2014)

- Design Review* $2,072/ Admin. $1,101
- Parking Exceptions/Reductions - see separate handout* $Actual Cost/Min $2,072
- Conditional Use Permit (major)* $Actual Cost/Min $2,072
- Conditional Use Permit (minor)* $1,101
- Sign Permit $1,479/$461 Admin.
- Temporary/Seasonal Conditional Use Permit* $461
- Lot Line Adjustment* $Actual Cost/Min $1,101
- Secondary Residential Unit* $1,101
- Parcel/Subdivision Map; Planned Unit Development; Condo Conversion* $3,357
- Variance* $2,072
- Other(s): Zoning Clearance + Deposit $310.00

*When obtaining more than one planning approval, the full amount for the highest fee will apply and ½ fee will be charged for any other ones.

General Plan Update Fee $45 included in the fees above. This fee only needs to be paid once for each separately submitted application.

**If applying for a Conditional Use Permit, please complete the Supplemental Questionnaire**

PROJECT DESCRIPTION (Please attach plans)

MODIFICATION OF AN EXISTING TELECOMMUNICATION FACILITY. REMOVE (3) EXISTING ANTENNAS & REPLACE w/ (3) NEW 4' ANTENNAS INSIDE EXISTING STEALTH BOX (1 PER SECTOR). INSTALL (3) NEW RRUS NEAR IN THE EQUIPMENT AREA.

UPGRADE BREAKER FROM 60A TO 100A FOR BTS CABINET.
TERMS AND CONDITIONS OF APPLICATION

I, the undersigned owner (or authorized agent) of the property herein described, hereby make application for approval of the plans submitted and made part of this application in accordance with the provisions of the City's ordinances, and I hereby certify that the information given is true and correct to the best of my knowledge and belief.

I understand that the requested approval is for my benefit (or that of my principal). Therefore, if the City grants the approval with or without conditions, and that action is challenged by a third party, I will be responsible for defending against this challenge. I therefore agree to accept this responsibility for defense at the request of the City and also agree to defend, indemnify and hold the City harmless from any costs, claims, penalties, fines, judgments, or liabilities arising from the approval, including without limitation, any award or attorney's fees that might result from the third party challenge.

For this purposes of this indemnity, the term “City” shall include the City of Albany, its officers, officials, employees, agents and representatives. For purposes of this indemnity, the term “challenge” means any legal or administrative action to dispute, contest, attack, set aside, limit, or modify the approval, project conditions, or any act upon which the approval is based, including any action alleging a failure to comply with the California Environmental Quality Act or other laws.

The signature of the property owner is required for all projects. By executing this form you are affirming that you are the property owner.

Table 1. T-Mobile RF summary

T-Mobile is proposing to add new 700 MHz LTE service to its wireless communication facility at the above noted address (Fig. 1). Three new panel antennas will be added beside the existing antennas behind FRP screening on a sign tower at the front side of the property.

![Figure 1. Facility and surrounding area](image-url)
PROTOCOL:

This study, and the calculations performed therein, is based on OET Bulletin 65, which adopts ANSI C95.1-1992 and NCRP standards. In particular, equation 10 from section 2 of the guideline is used as a model (in conjunction with known antenna radiation patterns) for calculating the power density at different points of interest. This information will be used to judge the RF exposure level incident upon the general population, and any employee present in the area. It should be noted that ground reflection of RF waves has been taken into account.

FCC’S MAXIMUM PERMISSIBLE EXPOSURE (MPE) LIMIT:

In order to evaluate the RF exposure level, the power densities at different locations of interest have been examined. Equation 10 from Bulletin 65 is reproduced here as equation 1:

\[
S = \frac{33.4 \, F^2 \, ERP}{R^2}
\]  

(1)

Where:  
\( S \) = Power density [\( \mu W/cm^2 \)]  
\( ERP \) = Effective radiated power [W]  
\( R \) = Distance [m]  
\( F \) = Relative field factor (relative numeric gain)

Scenario 1: Standing near the facility on street level

The RF exposure level of a six-foot tall person standing on ground level close to the facility is evaluated. For worst-case scenario, we assume that the antennas within a sector are transmitting the maximum number of channels, with each channel at its maximum power level.

The Maximum Permissible Exposure (MPE) limit for 1900 MHz (PCS) and 2100 MHz (AWS) facilities for general population/uncontrolled exposure is 1000 \( \mu W/cm^2 \), and 467 \( \mu W/cm^2 \) for 700 MHz facility. The maximum cumulative power density in the surrounding areas of the facility is calculated to be 1.9\% of the MPE limit.

---

2. Ibid., page 67. are shown
Scenario 2: Nearby buildings

There are various types of buildings in the surrounding area. The RF exposure levels on nearby buildings are evaluated. We assume again, all the antennas are transmitting with maximum power level. The maximum cumulative power density on a nearby building is calculated to be approximately 12.7% of the MPE limit.

Conclusions:

Under “worst-case” conditions, the calculations predict that the maximum RF exposure is 12.7% of the MPE limit for general population/uncontrolled exposure in the surrounding area of the facility. There is a relatively low level of RF energy directed either above or below the horizontal plane of the antennas, and there are no locations in the surrounding area near the T-Mobile facility will have RF exposure levels close to the MPE limit.

MUTIGATION MEASURES:

Due to the mounting location and height of the T-Mobile antennas, they would not be accessible to the general public. No mitigation measures are necessary to comply with the FCC general population/uncontrolled exposure guidelines. The carrier should take appropriate steps to ensure employees or contractors comply with FCC occupational exposure guidelines whenever work is required near the antennas.

FCC COMPLIANCE:

Based on the information provided by Cortel Inc. and the analysis above, the proposed modifications to the T-Mobile facility at 940 San Pablo Avenue, Albany, California, will comply with the prevailing standards for public exposure limit on RF energy. The general population / uncontrolled exposure near the facility, including persons on ground level, in nearby open areas, and inside or on existing nearby buildings will have RF exposure much lower than the “worst-case” scenario, which is well below the MPE limit.

LETTER OF AUTHORIZATION

Application for Use Permit Renewal/Building Permit

Owner of property (APN 66-2721-026-06) located at 940 San Pablo Ave. Albany, Ca 94706. ("Owner"), does hereby appoint T-Mobile West LLC, a Delaware limited liability company as agent for the purpose of applying for and attaining any permit or other necessary governmental requirement to use and construct improvements to the property leased to them for the purpose of constructing, operating and maintaining a telecommunications facility. I/We understand that the application may be denied, modified or approved with conditions and that such condition or modifications must be complied with prior to building permit issuance.
