TERMS AND CONDITIONS OF APPLICATION

I, the undersigned owner (or authorized agent) of the property herein described, hereby make application for approval of the plans submitted and made part of this application in accordance with the provisions of the City's ordinances, and I hereby certify that the information given is true and correct to the best of my knowledge and belief.

I understand that the requested approval is for my benefit (or that of my principal). Therefore, if the City grants the approval with or without conditions, and that action is challenged by a third party, I will be responsible for defending against this challenge. I therefore agree to accept this responsibility for defense at the request of the City and also agree to defend, indemnify and hold the City harmless from any costs, claims, penalties, fines, judgments, or liabilities arising from the approval, including without limitation, any award or attorney's fees that might result from the third party challenge.

For this purposes of this indemnity, the term "City" shall include the City of Albany, its officers, officials, employees, agents and representatives. For purposes of this indemnity, the term "challenge" means any legal or administrative action to dispute, contest, attack, set aside, limit, or modify the approval, project conditions, or any act upon which the approval is based, including any action alleging a failure to comply with the California Environmental Quality Act or other laws.

The signature of the property owner is required for all projects. By executing this form you are affirming that you are the property owner.

SUBMITTAL REQUIREMENTS FOR PLANNING AND ZONING APPLICATIONS
REQUIREMENTS MAY VARY WITH INDIVIDUAL PROJECTS – CONTACT STAFF FOR DETAILS

SELF-CERTIFICATION CHECKLIST

As part of the application, the following requirements must be included and each box checked by the applicant certifying that requirements have been satisfied.

- One (1) complete pdf version of plans (one document containing all pages)
- One (1) full-size set of plans
- Green Building Checklist
- Site survey prepared by a licensed surveyor for projects where construction is proposed less than 4 ft. from the property lines
- Installation of story poles ten days before the public hearing (second story additions only)

Project plans include the following for a complete submittal:

- Cover page including project description with FAR and lot coverage information
- Dimensioned site plan including proposed parking layout and curb cuts
- Existing elevations with building heights
- Proposed elevations with building heights
- Building sections
- Floor plans (existing and new)
- Roof plan
- Window schedule/details
- Street elevation showing neighboring properties
- Detailed photos of the existing home and proposed location of new development

Please check each box indicating you have sign below indicating that you have included all of the above information and understand that your applicant will not be processed until all of the information is included.

I have included the above information and understand that if there any incomplete information, my application will not be processed.

Re: 806 Curtis Street – Albany CA – Request for Design Review

Proposed:
Upper story front bedroom addition (86 SF) and rear bedroom addition (79 SF), and a lower story rear study room addition (79 SF) to the existing house. The ground floor level requires a column/pilaster element in order to maintain the existing 9'-11 1/2" clear passage to the existing 7'-6" wide by 7'-1" high garage door; the decorative column/pilaster feature is similar to other features found throughout Albany. The proposed existing building materials match the existing painted stucco walls, existing parapet roof and roof coverings, vinyl windows, and trims of the original house.

1. The proposed building height matches the existing parapet height and does not exceed the maximum allowable height.
2. The proposed floor area is allowable and does not exceed FAR limitations.
3. The sidewalls at the proposed addition will be setback to conform with the minimum required setbacks; the front and rear walls of the addition provides greater than the minimum setback required.
4. The open space below the proposed addition remains unenclosed to maintain the original vehicular access to the existing garage beyond.
5. On site parking will not be reduced or affected by the proposed upper story addition or by the supporting column/pilaster element at grade and will provide a covered, but unenclosed area where a small car could be sheltered from rain and sun in front of the existing one car garage.
6. Access to the existing side yard remains through a 9'-11 1/2" wide paved driveway.
7. The structural/decorative buttress element – the shaped top of the column/pilaster (concealing a structural beam) - does not enclose any habitable or usable space (nor could enclose any habitable or usable space) and is necessary structurally and positionally to maintain the driveway clearance, and is similar to the structural and decorative buttresses that project into required side yards found on many homes throughout Albany – elements which mark or celebrate side yard vehicular and/or pedestrian entrances. (The structural/decorative buttress is similar to a house at 822 Pomona Ave that was added to about 6 years ago.)
8. Removing structural and decorative buttress features from existing homes in Albany previously has been discouraged by staff and Commission when making Design Review Findings on other single-family residential applications. Precedent therefore can be found for preserving, repairing, restoring, recreating or proposing such structural and design elements as a Design Review feature that is harmonious with the existing home and pattern of surrounding homes.

9. The proposed addition is necessary and desirable for, and compatible with, the neighborhood.

10. The proposed improvements will not be detrimental or create adverse impacts in any respect.

11. The proposed improvements are consistent with the Zoning Ordinance and General Plan policies and standards, including the purpose and intent of Design Review to assure that resulting development is visually and functionally appropriate to site conditions and harmonious with surroundings and that site access and vehicular parking is maintained and sufficient.

Sincerely,

Jason Kaldis, Architect (Lic. C22085)
