FOR MEMBER OF THE CITY COUNCIL

Preston Jordan
Occupation: Engineering Geologist/Hydrogeologist

Age: 56

Another round of sidewalk repairs has started or will shortly because almost 80% of us voted for Measure P1 in 2016. This year you have the chance to vote for ranked choice voting for social justice and funds for building electrification to reduce global warming pollution while also advancing economic justice. These come before you as a result of my leading multiple community organizations for over a decade. If you put me on the Council I will do more, faster, to advance emergency preparedness, environmental sustainability, progressive taxation, and modern transportation. One of my primary priorities is a mandatory seismic retrofit ordinance for rental properties. While Albany has done better in the pandemic than most other Bay Area cities, scientists in my field forecast a disaster of a different kind on the Hayward Fault that will destroy as many as one out of four Albany homes if we do not act. I have served a combined 16 years on the Waterfront Committee, Charter Review Committee, and Transportation Commission. I’m honored to be endorsed by Mayor Nick Pilch, Councilmember Pete Maass, School Board member Sara Hinkley, and former Mayor Robert Cheasty. Please put me on the Council to move AlbanyForward.org.

/s/ Preston Jordan
