For Trustee of Board of Education

BRIAN BEALL
Occupation: Software Engineer

Age: 57

My family moved to Albany 14 years ago because of the beautiful community and excellent schools. My daughter attended Albany schools and is now attending a CSU master's program.

I attended high school in Richmond and earned a degree in mathematics at U.C. Berkeley. I have worked in Information Technology for 30 years, currently in DevOps, maintaining critical business applications. I also operated my own small business and taught technology basics to home and business computer users.

I am engaged in the Albany community in many ways. Notably, I was appointed to the City's Social and Economic Justice Commission. We worked on critical community issues, such as the Sugary Beverage Tax, and important values statements, like our Loving Day proclamation. I am also a graduate of Albany CERT, Albany Citizens Academy, and Alameda County Citizens Academy.

I love this community. As your board trustee, I will work to advance an inclusive culture of respect and safe environment for ALL students, teachers, staff, and parents. My highest priority will be that our students receive the quality education needed for a bright and productive future.

I appreciate your consideration and ask for your vote. Thank you.
